ToDos   vTcl 8.6.x

Priorities by Eisenhower principal … („importance over urgency")

- **A - Leads to target – and is critical or overdue – no other 'first' except other A!**
- **B - Leads to target … thus highest importance after A**
- **C – No A, No B then C**
- **X – Don't care**

Prio	Task & Doing	Target date	State
A	Start on last official release 1.6.1a1 and work in patches by Rildo Pragana for TCL/TK-8.5 When working with 8.5 put fixes for 8.6 on top. Fixed. Everything works fine with standard widget sets. BLT & Iwidgets hidden in dir. OLDstuff	Feb.2016	**Done** Put on GitHub **[PL0001]**
A	**Fix quirks with Mclistbox („… dont have a '-state' option …")** Replaced with latest Mclistbox code from Github	Feb. 2016	Fixed **Done** **[PL0002]** **[PL0003]**
A	Include 'tablelist' and make it internal	Feb. 2016	**Done** **[PL0004]**
A	Replace Bwidgets in version 1.3.1 by newer version (available 1.9.9.) Attempted, but needs wider work. Lot of modules …	Feb. 2016	Ongoing

A	Bring Iwidgets back to work
	Works if Itcl & ITK is present. But some widgets crash vTcl on project reload (Radiobox & Buttonbox). Needs to contact Iwidget developers Disabled them …
	`mv radiobox.wgt radiobox.wgt-disabled`
	`mv buttonbox.wgt buttonbox.wgt-disabled`
	
	Need to check all others as well.
	And … iwidgets 4.1 provides many more that are not yet wrapped by a .wgt file … lots' o'work ...
		Feb. 2016	Ongoing

B	Better versioning concept
	    M.R.mm.pppp
	
	`MM    – Master version (1-2 digits)`
	`RR    – Release (1-2 digits)`
	`mm    – Maintenance Release (1-2 digits)`
		Feb. 2016	Started, 2016-02-20
			Done, 2015-02-22/hph
			
			[PL0005]

Prio	Task & Doing	Target date	State
	pppp – Patchlevel (1..4 digits) (if present and resp. not 0 → GitHub version not for official delivery		
C	Replace all .gifs by .png graphics	Mar. 2016	Not started
